

CARPOOLING DEVELOPMENT IN FRANCE WITH THE APHP

Since nov 2019, the APHP has been rolling out an ambitious carpooling project with Karos for its employees and service providers at all its sites in IDF!

100k

workers in
IDF

38

Differents
Hospitals

3x8

24-hour on-site
staff

Improving the
accessibility of
hospitals

Fighting parking
saturation, by reducing
the number of cars on site

Reducing the carbon impact
of transports by promoting a
sustainable mobility solution

Impressive results in a few years

490k €

saved by
workers

170k

trips
certified

+200 tons

CO2 emissions
avoided

The most efficient carpooling
technology on the market. 3 min
average diversions per carpool.

6 months of free travel for the employees,
then an attractive tariff negotiated with our
local partners (IDF Region).

Support from our **sustainable mobility
consultants** for a simple and effective
launch in less than 2 weeks.

They deploy carpooling with Karos Mobility
